Kodak ScanMate i1150 Scanner

**Fast, friendly, and
very approachable**

Tackle tasks and streamline service

Kodak ScanMate i1150 Scanners are the perfect office mates to help you tackle a wide variety of office processes. Compact, quick, and whisper-quiet, with an intuitive interface and ample intelligence, the ScanMate i1150 is especially well-suited for face-to-face customer transactions. The ability to scan a mix of paper documents, IDs, and hard cards means you can capture information quickly and efficiently. Integration with other software and systems enables you to scan, extract data, and share information with ease. **Kodak** ScanMate i1150 Scanners are the ideal choice for desktop scanning in a full range of businesses, including medical office registration desks, bank teller use, state and municipal government offices, and insurance agencies.

Speed interactions

For customer-facing tasks, the transaction mode of the ScanMate i1150 Scanner helps you provide streamlined service.

- Capture the first 10 documents in a stack faster with transaction mode that speeds up 33% before returning to normal speed scanning
- Make customers happy with fast scanning and efficient transactions

Intelligence to work smarter and leaner

Say “Hello” to your intelligent imaging engines. **Kodak** ScanMate i1150 Scanners capture and distribute data with minimal user interaction to free up your work life.

- Smart Touch technology lets you perform up to nine different tasks with the push of a button — including creating PDFs, attaching documents to e-mails, organizing them in folders, or sending them to Cloud services
- Instantly view the number of documents scanned or paper ready status via the graphical display panel, providing users with useful information to help avoid or resolve errors

- Apply custom activity names and include color icons on the display panel to make scanning tasks quick and easy to select
- Save time by quickly sending data to the right places and people
- Deliver data to applications automatically with built-in barcode reading

Business friendly

Quick, quiet, and connected, **Kodak** ScanMate i1150 Scanners integrate seamlessly into a wide range of environments.

- Works with Windows, MAC, and Linux operating systems
- TWAIN, ISIS and Linux driver compatibility with business applications

Performance driven

Boost productivity and increase efficiency with features designed to prevent workflow interruptions.

- Alaris Perfect Page technology automatically improves the image quality of scanned documents with more than 30 enhancement functions

- Stay on task with fast, jam-free scanning of documents and even hard cards
- Protect valuable documents with Intelligent Document Protection that “hears” potential jams or misfeeds and stops scanning before damage can occur
- Keep materials organized with the convenient card holder
- Increase productivity with Alaris Capture Pro Software Limited Edition.

Productivity. Assured.

Get real world results

A county government agency provides medical, legal, and welfare services to help residents work toward higher levels of independence. With the huge volumes of paperwork generated, the cost of storing the documents on two floors of a warehouse is significant, and the time and effort involved in retrieving files is excessive.

To handle the constant barrage of data, they now use Alaris scanners as part of a browser-based digital workflow. The original workflow with shared scanning stations has recently been replaced by a system that includes a scanner for nearly all of the department’s 825 employees.

Finds big savings in small scanners

Cost Savings: file storage costs have been slashed, and future increases in storage space eliminated, now that scanned documents are electronically indexed and filed in a digital repository. In fact, after the scanning of a backlog is complete, the organization will completely vacate the warehouse space they have been renting.

Efficiency: space-saving **Kodak ScanMate i1150** Scanners are now available on desktops all around the department, allowing staff to complete scanning tasks when and where it’s most efficient. In addition, document retrieval now takes just a few clicks, meaning tasks that once took weeks can now be completed in a few minutes.

Productivity: thousands of documents a day are quickly and easily scanned rather than manually filed and transported so resources can be devoted to tasks more directly related to the agency’s mission. What’s more, the department creates backups of the digital files, so if the servers holding the working copies are ever damaged by fire or some other catastrophe, the department can restore the backups and get back to business quickly.
